Statement by Dr. Lakshman Jayaweera of Chunxing Corporation Re: Donation to flood affected victims in Latrobe Valley

11th July 2021

Dear Latrobe Valley Community,

On behalf of the Chunxing Group Chairman, Mr. Yang, I would like to convey our genuine sorrow for the residents of the Latrobe Community, particularly the people of the Traralgon Creek area, who have been severely affected by the latest flood. Having heard the sad news, we immediately became concerned for the wellbeing of the community. We can assure you that our hearts are with you through this difficult time.

In this regard, we have donated \$10,000 to your community via the local Lion's Club, a club which has always shown great commitment to directly servicing the needs of the local community. While this amount is small compared to the devastating impact the flood has had on your community, we hope that the funds can assist in some small way to recovery.

Chunxing Group will always have the community's best interests at heart and that we will always be on hand to offer our support, but particularly when the community is faced with a difficult challenge. This has been demonstrated in the past via the Chunxing Group's donation of funds to the community to assist the victims of the bush fires, the donation of approximately 100,000 surgical masks to the Latrobe Community to assist in the management of the Covid-19 pandemic, and by Chunxing Group having recently become one of the major sponsors of the local Churchill Cricket Club.

With our ULAB Recycling Facility to be built in Hazelwood North, we believe this investment will create a significant number of direct and indirect jobs for the local area, in addition to creating opportunities for local businesses. In fact, we are already seeing such opportunities arise through our engagement with local firms and local people to carry out the work in designing and construction of the plant.

We intend to continue this commitment of engaging the local community throughout the entire process and sincerely hope that such engagement with local stakeholders continues even after the plant is in operation.

Finally, I would also like to thank all the members of our recently formed Community Liaison Committee (ULAB CLC) for their invaluable advice and much appreciated guidance.

Regards
